

Rajesh Gangadharam

Full Stack Developer | React | FastAPI/Django | AI/GenAI Engineering

Phone: +91 7993763103 | rajesh2906@gmail.com | [linkedin.com/in/rajesh2906](https://www.linkedin.com/in/rajesh2906) | github.com/rajesh2961 | rajesh2906.netlify.app

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with strong **16 months of internship experience across 3 companies**, shipping production systems with React, TypeScript, FastAPI, Django REST Framework, PostgreSQL, Docker, and AWS. Strong Computer Science fundamentals: Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks. CGPA **9.20 out of 10**. Currently Exploring & Building GenAI applications with LangChain, RAG pipelines, LLM prompt engineering, and ChromaDB.

WORK EXPERIENCE

Full Stack Developer Intern

November 2025 - Present

Webvoid Technologies Pvt. Ltd. | Chittoor, Andhra Pradesh

Technologies: React.js, TypeScript, FastAPI, SQLAlchemy, PostgreSQL, Docker, GitHub Actions, AWS EC2, S3, RDS

- Owned **end-to-end development** of production features using **React**, TypeScript, **FastAPI**, SQLAlchemy, and PostgreSQL, and **Docker** in a production environment
- Built full-stack applications including an **online code compiler** (Judge0 API), job portal, job tracker resume builder, and edtech platform from frontend to backend.
- Developed **responsive React UIs**, designed REST APIs, implemented business logic, and integrated PostgreSQL databases for scalable applications.
- Implemented authentication, Hybrid(**RBAC+ABAC** with permissions), rate limiting, and API integrations to deliver secure, production-ready features.
- Collaborated in Agile sprints, taking features from requirements and design through development, testing, and deployment.
- Built an internal **LLM-powered tool** that fetches question and test-case data from PostgreSQL and **auto-converts test cases across programming languages**, cutting manual rewrite effort for the code compiler platform.

Backend Developer Intern

March 2025 - July 2025

Digital Hercules Innovations | Remote

Technologies: Django REST Framework, Python, Amazon Ads API, MySQL, Django ORM, JWT Authentication, RBAC

- Built Django REST APIs to fetch **Amazon Ads** data through schedules **Cron jobs**, automating daily data ingestion and processing pipelines
- Developed **backend data pipelines** to clean, transform, and store **Amazon campaign data** before sending it to **ML APIs** for prediction and content generation.
- Designed **asynchronous API** workflows to process **ML responses**, persist results in **MySQL**, and serve optimized data to the frontend with **JWT-authentication**.
- Reduced average page load time by **25%** through **API payload optimisation** and response contract redesign with the frontend team.

Web Development Intern

December 2023 - May 2024

Tri-Gen Tech IT Solutions | Tirupati, Andhra Pradesh

Technologies: HTML5, CSS3, JavaScript ES6+, REST API Integration, Responsive Web Design

- Built and maintained **5 responsive production websites**; reduced page load times by **30%** and bounce rate by **20%** via asset compression, lazy loading, and UI improvements; integrated third-party REST APIs.

PROJECTS

AI Course Assistant (GenAI - In Progress)

Technologies: LangChain, FastAPI, React.js, TypeScript, ChromaDB, OpenAI API, PostgreSQL, Docker

- Engineered a **Retrieval-Augmented Generation (RAG) pipeline**: documents chunked, embedded via OpenAI, stored in **ChromaDB vector database**, retrieved semantically via FastAPI backend with **LangChain multi-turn memory** and React frontend.

Alumni Network Portal | GitHub

Technologies: React.js, Django REST Framework, PostgreSQL, JWT Authentication, RBAC, Twilio SMS API

- Built full-stack platform with **JWT authentication**, **RBAC**, event and job board, Twilio notifications, and server-side pagination across **300 records at sub-100 millisecond response time**.

Stock Prediction Portal | GitHub

Technologies: React.js, Django REST Framework, Python, scikit-learn, LSTM, Random Forest, PostgreSQL

- Developed end-to-end ML application with **LSTM and Random Forest models** and feature engineering pipelines, achieving **15% improvement in prediction accuracy** over baseline; secured with JWT authentication.

TECHNICAL SKILLS

- Programming Languages:** Java (OOP), Python, JavaScript, TypeScript, SQL, HTML5, CSS3
- Frontend Development:** React.js, TypeScript, Component Architecture, REST API Integration, Responsive Web Design
- Backend Development:** FastAPI, Django REST Framework, SQLAlchemy, RESTful API Design, JWT Authentication, RBAC
- AI and GenAI:** Large Language Models (LLMs), LangChain, OpenAI/Claude APIs, Retrieval-Augmented Generation (RAG), ChromaDB, Vector Embeddings, Prompt Engineering
- Databases:** PostgreSQL, MySQL, MongoDB, ChromaDB, Database Indexing, Query Optimisation, ORM
- DevOps and Cloud:** Docker, GitHub Actions, CI/CD Pipelines, AWS EC2, AWS S3, AWS RDS, Git, Nginx, Linux
- CS Fundamentals:** Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks, OOP
- Competitive Programming:** 250 plus problems solved on LeetCode | leetcode.com/u/raj_sh

EDUCATION

Bachelor of Technology - Computer Science and Engineering

The Apollo University | Chittoor, Andhra Pradesh

CGPA: 9.22 / 10

Expected May 2027

Diploma - Computer Science and Engineering

Sri Venkateswara College of Engineering and Technology | Chittoor, Andhra Pradesh

90 Percent

2021 - 2024
